

Give your clients control of cancer

Cancer is the leading cause of death for working adults, and costs are continuing to rise year over year.

40% of people will be diagnosed with cancer in their lifetime.¹

#1 healthcare cost for your employer clients²

There are two ways to change the impact of cancer.

1. Catch cancer earlier

\$52K average savings from one stage shift³

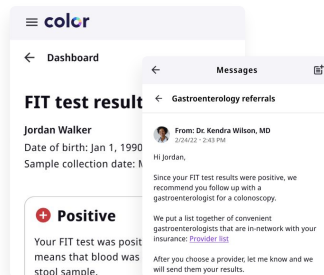

2. Ensure cancer treatment is well managed

\$19K estimated savings for each avoided hospitalization⁴

*Avg cost increase per cancer stage for colorectal, breast, cervical, lung, and prostate cancer, weighted to account for incidence by cancer type

The American Cancer Society (ACS) is a nonprofit organization that routinely publishes guidelines, and as part of this program, ACS contributes its expertise and educational materials on cancer screening and prevention and connects participants who contact ACS with ACS cancer-related information. A portion of the fees generated from this program will be used to support the ACS mission. ACS does not provide medical or clinical care.
