

How to Use an At-Home Kit for Your Dependent

Guide for registering and activating at-home kits for dependents

The screenshot shows the registration form with the following elements:

- Color and ThermoFisher Scientific logos at the top left.
- A red asterisk and the text: "Please select if you are a staff member or a student or parent/guardian below to display the correct sign up links." Below this are two buttons: "I am a teacher or staff member" and "I am a student or parent/guardian".
- Another red asterisk and the text: "Please select your school district." Below this is a dropdown menu labeled "School District" with a downward arrow.
- A search bar with a magnifying glass icon and the placeholder text "Enter your school's name".

The screenshot shows the account activation page with the following elements:

- Color logo at the top left and "Get Help" link at the top right.
- Section header: "Activate your COVID-19 test kit." Below this is a paragraph explaining the partnership and the importance of testing.
- Section header: "Do you have a Color account?" Below this are two buttons: "Yes, I have a Color account." with a "Sign In" button, and "No, I don't have a Color account." with a "Create Account" button.

1 Get Started

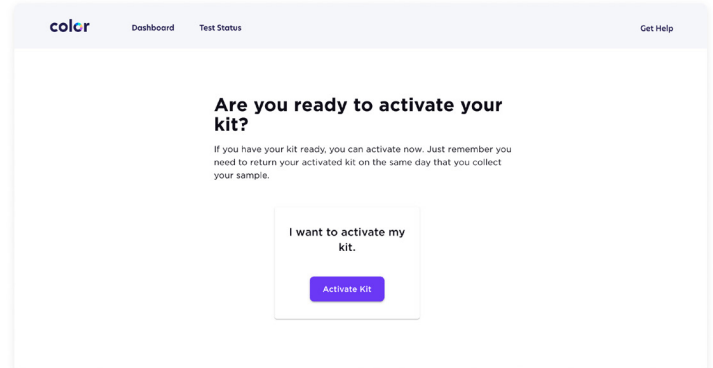

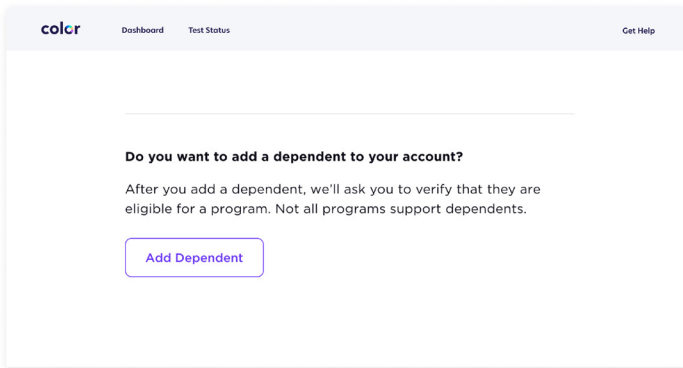

Select the unique link for your school

1. Go to color.com/readycheckgo-arkansas and select "I am activating an at home kit"
2. Select you or your dependent's (child, student) school district and school
3. You'll be taken to a link that is unique to you or your dependent's school

2 Create a Color Account

After selecting you or your dependent's school, create or log into a Color account

1. Create a Color account using your information (name, email, password). You'll enter your dependent's information later
2. Confirm your email address

3

Add a Dependent to Your Color Account

You'll provide consent and activate their kits from your account.

1. Navigate to color.com/activate
2. Click "Add Dependent"
3. Enter your dependent's (child or student) name and date of birth
4. Certify that you have the legal authority to make decisions on behalf of this individual. Click "Continue"
5. Double check that the information you enter is that of your child or dependent

Important: If you have multiple dependents at different schools, repeat Getting Started steps 1-3 above to find their school's unique link, then log into your Color account to add each additional dependent

4

Activate a Kit

Activating a kit associates a person with their sample, so the lab knows who to send results to. The lab cannot process unactivated kits.

1. Select the person who is providing the sample - either the account holder or a dependent
2. Check the checkbox to provide consent
3. Enter contact and demographic information for the person taking the test
4. Enter the barcode (D-) and accession (C-) number on the side of the tube
5. You will receive an email and text message confirming the kit was successfully activated
6. Collect the sample and return the kit
